**Petition to Withdraw Holding of Abandonment Based on Failure to Receive
Notice of Non-Compliant Amendment Pursuant to 37 C.F.R. §1.181**

Dear Sir:

This petition is presented for the purpose of requesting withdrawal of the holding of abandonment. Provided herewith is evidence that Applicant did not receive a copy of the Notice of Non-Compliant Amendment allegedly mailed November 6, 2008 in the above-captioned application.

Applicant received a Notice of Abandonment mailed May 13, 2009, alleging the above-captioned application was abandoned for failure to properly respond to the Notice of Non-Compliant Amendment dated November 6, 2008.

Neither Applicant nor Applicant's undersigned representatives received a copy of the Notice.

The address of record to which the Notice was supposedly mailed is: Hunton & Williams LLP, Intellectual Property Department, 1900 K Street, N.W., Suite 1200, Washington, D.C. 20006-1109, which is the mail repository for all in-coming mail from the PTO. Applicant's representatives enter all in-coming mail from the PTO in its docketing system. Had Applicant's

representatives received the Notice, the response due date would have been entered into the docketing system for December 6, 2008.

Attached hereto is Exhibit A, a declaration of James R. Miner, the attorney responsible for prosecuting the above-captioned application, indicating that the Notice was not received at the correspondence address of record, and that a search of the practitioner's records, including the file jacket and the application contents, indicates that the Office action was not received.

Also attached hereto is Exhibit B, a redacted copy of the master docket for the firm, where the non-received Office action would have been entered had it been received. The redacted copy of the master docket for the firm shows all replies docketed for the day of December 6, 2008, which includes the date one month from the alleged mail date of the Notice when the response would have been due. The docket reveals that no Response due date was docketed for the above-captioned application.

Also attached hereto is Exhibit C, a copy of the PTO mail log for the firm, where the non-received Office action would appear had it been received. The copy of the mail log for the firm shows all PTO correspondence received from the day of November 4, 2008 to December 8, 2008. The mail log reveals that no correspondence from the PTO was received in the above-captioned application.

The evidence presented herein shows that neither Applicant nor Applicant's representatives received the Notice allegedly mailed November 6, 2008. Accordingly, Applicant respectfully requests withdrawal of the holding of abandonment. Applicant further requests that a new Notice be issued and mailed to the mailing address of record.

In addition, Applicant submits herewith a Reply to the Notice of Non-Compliant Amendment.

It is respectfully submitted that no fee is required for consideration of this Petition.
However, in the event any fee is deemed necessary, the Commissioner is authorized to charge
the undersigned's Deposit Account No. 50-0206.

Declaration of James R. Miner

I, James R. Miner, registration number 40,444, do hereby state as follows:

- 1) I am the attorney responsible for prosecuting the above-captioned application.
- 2) I am of counsel in the law firm of Hunton & Williams LLP, and I am familiar with the firm's docketing and in-coming mail procedures. To the extent I may not be completely cognizant of the applicable procedures for the present case, I have consulted with individuals at my firm responsible for these duties to become familiar with the procedures.
- 3) My firm, Hunton & Williams LLP, is currently prosecuting this application. The address of record is: Hunton & Williams LLP, Intellectual Property Department, 1900 K Street, N.W., Suite 1200, Washington, D.C. 20006-1109, which is the mail repository for all in-coming mail from the PTO.

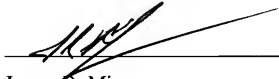

4) Our docketing department enters all in-coming mail from the PTO in its docketing system. Had my firm received the Notice of Non-Compliant Amendment allegedly mailed November 6, 2008 ("Notice"), the response due date would have been entered into the docketing system for December 6, 2008. I have reviewed a copy of the master docket report for the day of December 6, 2008, and discovered that no response due date was docketed for the above-captioned application.

5) Our docketing department keeps a mail log for all in-coming mail from the PTO. Had my firm received the Notice of Non-Compliant Amendment allegedly mailed November 6, 2008 ("Notice"), the Notice would appear on the firm's PTO mail log. I have reviewed a copy of the mail log from the day of November 4, 2008 to December 8, 2008, and discovered that no correspondence was received for the above-captioned application.

6) Finally, I personally reviewed the file jacket for evidence of a paper copy of the Notice and found none.

I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

 - presenting, via a computer network, a user with a series of questions relating to at least one business category;
 - soliciting, via the computer network, a response from the user for each question presented;
 - determining a detection index based on the number of responses, and corresponding answers, to each of the series of questions;
 - determining an occurrence index based on the potential consequence of non-compliance;
 - determining a standard severity risk index based on the expected severity of non-compliance; ~~and~~
 - prioritizing, via the computer network, the at least one business category based on the user's responses and at least one total risk score comprising the product of the detection, occurrence and standard severity risk indices; and
 - displaying the prioritized at least one business category and at least one total risk score.
2. **(Currently Amended)** The computer implemented method of claim 1 wherein the user response comprises a "Yes" or "No."
3. **(Currently Amended)** The computer implemented method of claim 1 wherein the at least one standard severity risk index comprises a number between 1 and 10 corresponding to a specific level of risk.

6. **(Currently Amended)** The computer implemented method of claim 1 further comprising the step of determining a detection index based on the number of questions presented in the series of questions, the user's responses, and the number of users.

7. (Canceled)

8. (Canceled)

9. **(Currently Amended)** The computer implemented method of claim 1 further comprising ranking the at least one business category based on the at least one total risk score.

a prioritization module associated with the engine for: (1) determining a detection index based on the number of responses to each of the series of questions, determining an occurrence index based on the potential consequence of non-compliance, and determining a standard severity risk index based on the expected severity of non-compliance, and (2) prioritizing the at least one business category based on the at least one user's responses and at least one total risk score comprising the product of a detection, occurrence and standard severity risk indices; and an administration module associated with the engine for displaying the prioritized at least one business category and the at least one total risk score.

11. **(Currently Amended)** The computer based system of claim 10 wherein the series of questions are presented to the user over a communications network.

12. **(Currently Amended)** The computer based system of claim 10 further comprising ~~an~~ the-administration module associated with the engine for inputting, updating and accessing data associated with the query and prioritization modules, the administration module being accessible to an administrator of the system via an administration interface.

13. **(Currently Amended)** The computer based system of claim 10 wherein the user response comprises a "Yes" or "No" response.

14. **(Currently Amended)** The computer based system of claim 10 wherein the at least one standard severity risk index comprises a number between 1 and 10 corresponding to a

specific level of risk.

15. **(Currently Amended)** The computer based system of claim 14 wherein the number “1” comprises the lowest level of severity, and the number “10” the highest level of severity.

16. **(Currently Amended)** The computer based system of claim 10 wherein the at least one standard severity risk index corresponds to the at least one business category.

17. **(Currently Amended)** The computer based system of claim 10 wherein the detection index is based on the number of questions presented in the series of questions, the at least one user’s responses, and the number of users.

18. (Canceled)

19. (Canceled)

20. **(Currently Amended)** The computer based system of claim 10 wherein prioritization module further ranks the at least one business category based on the at least one total risk score.

21. **(Currently Amended)** The computer implemented method of claim 1 wherein the detection is determined by the following formula:

$$\text{Detection index} = \frac{\sum_{i=1}^n i(\# \text{ of answers}_i)}{(d)(n)},$$

wherein i refers to each possible response,

$\# \text{ of answers}_i$ refers to the number of queries or questions that were answered with a particular response i ,

n refers to the total number of queries or questions in that category, and

d refers to the number of departments or units responding.

22. **(Currently Amended)** The computer implemented method of claim 1, wherein the occurrence index weighs the total risk score based on the potential consequences of non-compliance.

23. **(Currently Amended)** The computer implemented method of claim 1, wherein the potential consequence of non-compliance is based on the total number of agents or employees affected by non-compliance.

24. **(Currently Amended)** The computer implemented method of claim 1, wherein the potential consequence of non-compliance is based on the total number of policies in force.

25. **(Currently Amended)** A computer implemented method for use in compliance management, comprising:

presenting, via a computer network, at least one user with a series of questions relating to at least one business category;

soliciting, via the computer network, a response from the at least one user for each question presented;

determining a detection index based ~~directly~~ on the number of responses to each of the series of questions;

assessing a potential consequence of non-compliance, the potential consequence of non-compliance relating to parameters and the values of such parameters;

determining an occurrence index based ~~directly~~ on the potential consequence of non-compliance that was assessed, such that the occurrence index changes as the parameters associated with the potential consequence of non-compliance change, the occurrence index that is determined being one of at least three possible occurrence indices, the at least three possible occurrence indices being provided as possible occurrence indices;

determining a standard severity risk index based ~~directly~~ on the expected severity of non-compliance; and

prioritizing, via the computer network, the at least one business category based on the at least one user's responses and at least one total risk score, the at least one total risk score being based on the detection index, the occurrence index, and standard severity risk index; and

the total risk score being determined as equal to the product of the detection index, the occurrence index, and the severity risk index, such that the higher the total risk score, the more severe the risk of non-compliance; and

wherein the determining being performed such that:

the detection index weighing the total risk score based on the responses provided

to the individual questions;

the occurrence index weighing the total risk score based on the potential consequences of non-compliance; and

the severity risk index weighing the total risk score based on the expected severity of non-compliance; and

the method further including associating each business category with particular detection, occurrence, and severity risk indices.

26. **(Currently Amended)** The computer implemented method of claim 1 wherein the detection index is determined by a relationship between the number of queries or questions that were answered with a particular response, the total number of queries or questions in the category, and the number of departments or units responding.
